Your Personal Privacy Blockchain Solution

UltraNote Infinity Specs

Name: UltraNote Infinity

Ticker: XUNI

Max supply: 21 Million

Mining Rewards: 5 XUNI/ block-Increases by .40 XUNI/ Month until 10XUNI/ Block

Mining: 7-8 years

Block target: 2 minutes

Maturity Time: 10 Blocks

Blockchain Deposit Interest Rate: 3% per Year (264,000 Blocks)

Deposit Term Interest: 0.25% / month & Up to 3% / Year

Transactions per Seconds: 400+ Scalable

Blockchain: CryptoNote v.2

Mining Algo : CryptoNight Conceal

Mining Specifications: CPU Wallet Integrated Mining & GPU Efficient (ASIC Resistant)

TX Fee: 0.001 XUNI

UltraNote Privacy Solution

“UltraNote has been designed to solve 2 core problems inherent to the most important aspects of our daily life; Communication and Transferring funds which both require trustless privacy and security. “

What is UltraNote ...?

UltraNote is a decentralized Open Source Privacy Blockchain Network Offering the most Advanced Digital Version of CASH & Encrypted Privacy Communication.

UltraNote is a fungible, secure, decentralised and trustless privacy solution essentially designed for people who understands the value of total Confidentiality. With UltraNote you do not only take control over your freedom to communicate, do business, make payments or browse the web but also shape your financial lifestyle . You and only you control and hold responsibility of your UltraNote Infinity Coins, Messages, Payments, Browsing activities or Files.

What happens on UltraNote Stays On UltraNote

On UltraNote whatever you do is kept safe from intrusive eyes through peer to peer encryption(Only the sender & receiptent have the keys to access relevant transactions). As a decentralised ecosystem UltraNote has No Central Authority & thus no single point of failure. UltraNote uses advanced cryptographic techniques built on Privacy Blockchain Technology to validate and broadcast transactions without revealing transaction information.

UltraNote transactions are completely Confidential, Untraceable and Anonymous

Mission, Vision & Values

"In A World Where Everyone Spies On Each Other, You Have To Be Invisible To Protect Your Privacy"

Our Vision & Mission is to establish a Decentralised Confidential Communication and Financial solution built specifically for privacy, anonymity, untraceability and most importantly opacity.

Download your wallet: <https://www.ultraNote.org/#wallet>

No Question Asked/ No KYC

By Eliminating the need for a central authority vulnerable to hacking or paving access to censorship and institutional intervention; UltraNote is leveraging blockchain technology to solve multiple well known mainstream services privacy issues. UltraNote is actively developed to provide a better, safer and fairer environment for people to interact and transfer value with complete privacy & freedom.

Our Key Objective

Our Key Objective is to establish UltraNote as a leading privacy blockchain and privacy platform exclusively built around anonymity, untraceability, security, fungibility and opacity. Offering an opaque ecosystem UltraNote ensures that anything that happens on it's platform is obfuscated from any 3rd party regardless of their hierarchy of authority.

Why should I use UltraNote?

There is simply No mainstream service provider which offers as many privacy services like UltraNote does from 1 single application. UltraNote is founded on 3 absolutely game changing technical pillars which give it all its raison d'être and outstanding value proposition.

- Completely Decentralised Blockchain
- Ultimate Privacy Solutions
- Multilayer Encryption with Integrated VPN & Tor Network

With UltraNote you have the peace of mind that all your transactions, messages, confidential documents or browsing activities are anonymous, untraceable and encrypted.

What Can I do with UltraNote Services?

- Execute Anonymous & Untraceable Instant P2P Payments.
- Issue Invoices & Request Anonymous & Untraceable Invoice Payments with QR Code.
- Send Anonymous & Untraceable Self Destruct P2P Blockchain Encrypted Messages.
- Send Anonymous & Untraceable SHA 2048 Encrypted Documents & Files via P2P IPFS Decentralised Protocol.
- Bank like Blockchain Fixed Deposit for 3% annual Interest.
- Execute Anonymous & Untraceable Web Search.
- Browse The Web & DarkWeb on the Tor Network with complete anonymity.
- Mine UltraNote Infinity Coins directly from Wallets.

Anonymous & Untraceable Instant P2P Payments

It is well recognised that the serious lack of fungibility is what keeps Bitcoin as well as other similar public ledger Digital Currencies to achieve the highly sought after position of digital cash. On the other hand UltraNote due to its privacy blockchain is by default the true definition of Digital Cash. Similar to Cash; UltraNote Payments are instant, peer to peer, Anonymous & Untraceable. As much as it is impossible to accurately traceback Cash transactions; UltraNote uses CryptoNote Technology to obfuscate financial transactions making them impossible to trace back.

Merchant Invoice System

As a privacy payment solution; It is important for merchants to have the ability to automatically send payment requests as well as issue invoices to clients without having to leave the UltraNote ecosystem. It is thus valuable make UltraNote the most merchant friendly privacycoin by introducing the invoicing system.

To request a payment is as easy as filling-in a regular invoice before sending it to the client. Using the QR Code or Pay Invoice function, The invoice details will be automatically filled for the client who simply have to validate the payment.

Private Self Destruct P2P Blockchain Encrypted Messages

The revolutionary concept of blockchain technology has today empowered communities to safely execute highly secured peer to peer financial transactions in a very timely manner. UltraNote is now pushing the blockchain technology applications even further by offering cutting edge Blockchain Encrypted Peer to peer Messaging services. Similar to regular emails like Gmail or Outlook; UltraNote Encrypted Messaging service allows users to edit and send private messages to their contacts. The major difference between Gmail, Outlook and UltraNote Messaging service is the Decentralised Blockchain Encryption structure which is very unique to UltraNote Blockchain. As a Privacy Blockchain Solution it is important to underline that UltraNote Messages also have the Self Destruct Option which will automatically destroy the Encrypted Messages from the blockchain to ensure ultimate confidentiality.

SHA 2048 Encrypted IPFS File Transfer

If you are familiar with mainstream email services like Gmail, or Outlook but need the extra layer of privacy that UltraNote offers; you will definitely enjoy UltraNote Messaging & File Transfer services. Similar to emails, UltraNote messaging allows you to send & receive documents as well as media files as attachments. Sending an attachment is as easy as sending an email. UltraNote GUI wallet first automatically encrypts your files in SHA 2048 & then sends the files to the recipient's GUI wallet via the IPFS Encrypted Decentralised Protocol. While Gmail or other emailing services use centralised servers networks to distribute emails; UltraNote peer to peer network has NO central server thus removing single point of failure risks. On UltraNote you also enjoy a file upload size of 100MB which is 4X larger than any mainstream email service provider (e.g Gmail 25MB).

Blockchain Deposit for 3% annual Interest

UltraNote is a hybrid POW & POS Blockchain which allows UltraNote stakeholders to secure the blockchain by either validating blocks as miners or as stakers. Staking your UltraNote Infinity Coins on the UltraNote blockchain is as simple as a Bank Fixed Deposit. You enter the amount of UltraNote Infinity Coins you would like to Deposit, Select the duration of the Deposit and validate your deposit. The Blockchain will automatically calculate the amount of Interest to be earned at Maturity and give you the unlock height as well as an approximate date of Maturity. At maturity the Staker can simply withdraw the Deposit with Interest and either Deposit the UltraNote Infinity coins again or spend the coins. The terms of Deposit range from 0.25% per Month up to a Maximum of 3% per Year.

The More you Deposit the More You Earn!

Anonymous & Untraceable Web Search Engine

It is no news that in this day and age, Information is highly valuable and monitoring/ tracking your online searches and activities is how 99.9% of mainstream Search Engines like Google, Bing or Yahoo make millions in profits every year. While there is No Financial Cost in using Google; You are nevertheless paying a much higher price by automatically turning in your Private Information when "Googling" a new pair of shoes or a new toy for your dog. Collecting information about you and your online activities automatically allows Google to provide access to highly private information about you to marketers as well as government institutions. By using UltraNote Search Engine you are simply taking the adequate step to enjoy a *surveillance Free* Search Engine experience with 0 data collection or Invasion of privacy.

Everyone is Invited to request adding his/her website to the UltraNote Privacy Search Engine.

VPN, Tor Browser & DarkWeb Access

Are you curious about the DarkWeb or regularly visit websites which you would prefer to keep Confidential? UltraNote Tor Browser is Exactly what you need. It is perfect for individuals as well as institutions who either have something to hide or in need of online anonymity.

UltraNote Tor Browser technology was initially developed for military purposes. It uses advanced data encryption protocols in order to protect your personal data as well as your online privacy. By Enabling Tor Network in your wallet settings; it furthermore activates the integrated VPN (Virtual Private Network) making your online experience much safer than your regular Chrome or Opera browser. UltraNote Tor Browser ensures that your data is securely encrypted along with TorGuard VPN hiding your “real”, static IP-address by displaying the IP of the VPN server you’re connected to. Simply put No one can know for sure who is accessing what and from where. You instantly become Anonymous & Untraceable.

Note: UltraNote Tor Browser should NOT be used for any illicit activity. UltraNote is NOT liable for any inconvenience caused as a result of illicit activities.

Wallet Integrated Mining

UltraNote Blockchain Proof of Work (POW) Algo by nature relies on it's miners to secure the ecosystem. In simple terms the more miners working on the blockchain the better it gets for everyone. It is with the idea to develop a well decentralised blockchain network that we integrated a CPU efficient UltraNote mining software directly to the GUI Wallet. Mining UltraNote Infinity Coins from the GUI wallet does not require any particular mining equipment or knowledge. Go to Mining, Select the number of Cores you wish to allocate to mining, select your pool and click start mining. We encourage every UltraNote stakeholder regardless of how big or small you are to contribute to the miners network and get rewarded for it. As an ASIC resistant, GPU & CPU efficient blockchain it is possible to mine UltraNote Infinity Coins with as little as 1 CPU Core. Mined UltraNote Infinity Coins are automatically deposited in your GUI Wallet.

How can I get UltraNote Infinity Coins?

UltraNote Infinity Coins are utility coins that we refer to as the fuel necessary to pay for transactions executed on the UltraNote Blockchain. There are 3 ways to get UltraNote Coins.

1st Mining GPU Or CPU (Asic Resistant)

2nd Buying from Miners on Exchanges

3rd Deposit Coins on the blockchain & create New UltraNote Infinity Coins as reward for securing the blockchain. Similar to a Fixed Bank Deposit at maturity you will either receive 3% interest per year payable as early as monthly terms 0.25% per month.

Who Own UltraNote Project?

In a straight and clear answer, No one owns UltraNote Project. We can only own UltraNote Infinity Coins. UltraNote Blockchain is opensource and decentralized. As an Open Source & Decentralised Privacy Solution UltraNote is by default protected against censorship or institutional intervention. Contributions to the UltraNote Project are purely voluntary. UltraNote Project as well as UltraNote Community Do Not own any rights over the contribution made by volunteers towards the project.

UltraNote Project cannot be held liable for any community's contribution misuse or misconduct of their creators. Community contributions are made available to UltraNote Project purely voluntarily and at their creators' discretion.
